

The Trinidad and Tobago Solid Waste Management Company (SWMCOL) is pleased to launch our new HD Shredder – 'The Slayer'. This innovative acquisition is uniquely flexible and was specially selected for its design strength, durability and serviceability. The shredder is aptly named 'The Slayer' because it trashes all materials in our applications.

The SWMCOL Slayer further enhances SWMCOL's drive to reduce, reuse, recycle and recover, where possible, a wide range of materials from household waste to construction waste. The shredder provides for the coarse and medium shredding of untreated municipal solid waste, bulky waste and commercial and industrial waste. The inherent operational efficiencies would permit us to realize high capacity volume reduction of landfill waste in our thrust to optimize landfill utilisation.

This shredder is fully equipped to separate metals from other waste during the shredding process. It has a relatively small footprint which allows for high

manoeuvrability in tight spaces as well as deployment across rough terrain when necessary. Its 350hp engine quietly and quickly destroys any material in its way.

#### The SWMCOL HD Shredder Trashes:

- All types of wood (including pallets),
- Construction & Demolition material,
- Green waste (including grass / trees / stumps)
- Domestic and household waste,
- Commercial and industrial waste,
- Tyres (including rims),
- White household goods,
- Paper and cardboard ,
- Mattresses and
- All plastics.

## PERFORMANCE DRIVEN
